
By awakening the mind clarity of thought is attained
Through focused effort thought can shape reality
In ways that mirror the growth of inner dimensions
The transformation of the external environment
Reflecting the natural changes that occur within
The conscious refinement of thought aligning
With higher vibrational frequencies which impart
Information in ways unfamiliar to minds that are
Unreceptive to frequencies of higher dimensions
The messages of the subtle energetic realms unable
To take firm root in the third dimensional density
Where they are needed now more than ever
Given humanitys tendency to ignore insights of a
Nature beyond the limits of personal experience
